

Kansas Customer Water System Service Line Inventory Questionnaire

Water System Name

Dear Water Customer:

The U.S. Environmental Protection Agency (EPA) recently issued regulations requiring all public water supply (PWS) systems to develop a Lead Service Line Inventory (LSLI) of both water system owned and your privately owned service lines. Your PWS system must submit this inventory to the Kansas Department of Health and Environment (KDHE) by October 16, 2024.

While these contaminants are not in the source water, they can enter tap water through the corrosion of service line piping and older household plumbing materials. Your water system is sending this survey to all customers asking that you complete and return the form below. We thank you for your cooperation in helping us with this to continue to serve clean and safe drinking water to our customers. Please take a few minutes to complete this questionnaire to the best of your ability and return to the address at the end of the questionnaire.

Additional information on the Lead and Copper Rule and identifying lead pipes and plumbing can be found on the KDHE website at: kdhe.ks.gov/547 or at the EPA Website at: epa.gov/dwreginfo/lead-and-copper-rule

Contact Information

Name of Person filling out this questionnaire: _____

Phone Number should we have questions: _____

Property Street Address: _____

Structure Type: Single Family Home _____ Multi-Family (duplex/Quadraplex) _____
 Apartment _____ Commercial Building _____ Industrial Facility _____

Year Built: _____

Materials List (Check all that apply) See drawing on back of this paper for more information.

1. What pipe material is the service line pipe entering your house, foundation or business made of?

Lead _____ Copper _____ Galvanized Steel _____ PVC _____

Polyethylene _____ Unknown _____

2. What year was your service line installed? _____ (This may be the year structure was built)

3. What size pipe is the service line entering your house or business? _____ inches

4. What material are the plumbing pipes in your house or business mostly made of?

Lead _____ Copper _____ Galvanized Steel _____ PVC _____
